LETTER OF APPRECIATION

Dear Atindra Shekhar (E19CSE187),

I express my deep appreciation for your dedicated service as a Student Teaching Assistant for the courses CSET101 and CBCA102 at Bennett University.

Your dedication to the students is evident because you conducted the highest number of labs and lectures during your tenure from October 2022 to December 2022. Students appreciated your ability to explain complex concepts through real-world examples which has helped them understand Python better.

Additionally, your availability to students outside of class hours and your willingness to help them with their queries is truly admirable. The special doubt-clearing sessions which you conducted during the weekends show your commitment to ensuring that students understand the concepts well. I am glad you volunteered for the 12 hours night-shift hackathon in November 2022 and were a panelist for evaluating first-year student projects in December 2022.

I wish you the very best in your future endeavors.

With Sincere Regards

Dr. Deepak Garg
Dean, International relations & Corporate Outreach;
Dean, School of Computer Science Engineering & Technology
Bennett University, India
